John Meyer joined The Winder Company as a Sales and Leasing Associate in June of 2007.

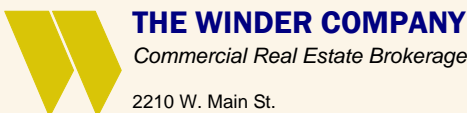

John and his wife Isabel met in college in 1968 and married in 1969. They have two children, Dr. Nicholas Meyer and Dr. Jessica Austin. They have a total of 6 grandchildren.

John graduated from California State University in 1976 with a Bachelor of Arts Degree in Sociology with an emphasis on societal dynamics. That same year he completed his Bachelor of Science Degree and his Doctor of Chiropractic Degree from the University of Pasadena-School of Chiropractic in California. He performed his clinical requirements at the university's outpatient clinic. He holds both California and National Board Licenses.

He practiced in Huntington Beach and Paso Robles, California, from 1976 until late 2005, when he retired, giving over his practice to his son Dr. Nicholas Meyer. John's involvement in the medical field allowed him to develop relationships not only with doctors from many disciplines, but with numerous other professionals and business men and women. He quickly understood the need of these busy business people. All shared similar needs and desires when it came to their business facilities and real estate investments. Most were experts in their work, but had very little time to investigate important property decisions. John has personally purchased and developed professional properties, and vineyards in California and Idaho. He has assisted many professionals and investors with finding property that is a good fit for them.

John's years of professional practice and hands on investing and development experiences made him an ideal professional to complement The Winder Company Team. He came out of retirement "...because there's only so much fishing a man can do. I've been helping people for 30 years as a doctor. I wanted to continue to help, but in a different way. Now I had this marvelous opportunity to change careers and take my passion for real estate and use it to help others."

John is currently working with clients on development and use concepts of old properties. He is helping to identify suitable property for unique and different uses. He is also working with nationally recognized retailers locating ideal locations to open new shops in the Treasure Valley.
